

20<sup>th</sup> May 2026

Dear Parents and Carers,

We are delighted to share some exciting news about an upcoming learning opportunity for our Year 6 children. As part of our Summer Term science curriculum, we will be taking part in a live virtual visit from Whipsnade Zoo.

During this interactive session, the children will have the opportunity to engage directly with expert zookeepers, gaining fascinating first-hand knowledge about a variety of animals. This experience will deepen their understanding from our spring science topic, *Evolution and Inheritance*, by exploring how different species have adapted to survive in their environments.

The session will include:

- Live discussions with zoo professionals
- Close-up looks at animals and their habitats
- Opportunities for children to ask questions and deepen their curiosity

The virtual visit will take place during the school day on **Tuesday 9th or Wednesday 10th, June 2026** during the children's regular lesson times.

We kindly ask for a contribution of **£1.59 per child** to support the cost of this experience. Please pay via Arbor.

This is a fantastic opportunity to bring our classroom learning to life and inspire a deeper interest in the natural world.

Thank you, as always, for your continued support.

Kind regards,

Mrs West

Mrs Bennett

(Year 6 lead)

(Science Lead)
